Strategies for Success
Under the Patient Driven Payment Model
August 22nd, 2019

EVENT SUMMARY

This day-long program will help administrators, directors of nursing, MDS coordinators, therapists and other members of the interdisciplinary team (IDT) team apply information learned about PDPM to develop strategies to capture the most accurate reimbursement rates possible for each Medicare Part A stay.

Robin Hillier will discuss how to choose the patient’s primary reason for the SNF stay; how to code key MDS sections including GG, I, J, and K; the importance of resident interviews; how to rethink the selection of the Assessment Reference Date for the five-day assessment; and improving IDT communication and documentation to achieve a thorough and accurate five-day assessment.

This is not a replacement or duplicate of the PDPM training that was offered by NCHCFA in March 2019, but will focus more on strategies. This session will also include PDPM related information from the draft RAI manual update.

To help you prepare for the Patient Driven Payment Model (PDPM), Robin Hillier will review important topics to help you be better positioned and more likely to succeed during and after the implementation of PDPM.
