

Nursing Home Incident Command System (NHICS)

October 29, 2019 1:00PM - 5:00PM

All nursing homes should be prepared for and exhibit resiliency when faced with any type of incident, ranging from an internal emergency that affects only one facility to a large, regional disaster that simultaneously affects many healthcare facilities and the community. The Incident Command System (ICS) provides a practical, proven approach to disaster management that is an integral part of the National Incident Management System (NIMS). ICS is utilized for incident management throughout the public and private sectors.

3.5 Hours of CE through NAB (Pending)

This course *may* be taken as stand-alone; however, priority seating will be provided for participants enrolled in both modules.
Cost: \$65/participant.

Presented by:

**Mountain Area Healthcare
Preparedness Coalition**

and

Location:

Haywood Community College
Public Safety Training Center
186 Armory Drive
Clyde, NC 28721

The audience for this series consists of all leaders within lower-acuity healthcare provider organizations, critical access hospitals, and hospitals with fewer than 50 beds. Despite the name (NHICS), the audience is not limited to nursing home staff.

Priority seating for this course will be provided for Mountain Area Healthcare Preparedness Coalition regional partners and stakeholders.

Cost: \$150/participant. Checks accepted day of course, payable to Mission Hospital

Licensed Care Facilities: Safe Evacuation

October 30, 2019 9:00AM – 5:00PM

Evacuation of residents of a residential healthcare facility is an expensive and traumatic event for staff, residents, and residents' families. Sometimes it is necessary for life safety and continued care. Therefore, facilities must have a thorough understanding of the risks and costs involved in either sheltering in place or evacuating is essential. Facility staff and leadership need to have developed clear plans, policies, and procedures to guide their decision-making and the evacuation itself. National standards, best practices, and case histories will guide the training.

Requires successful completion of Nursing Home Incident Command System on 10/29.
